

Received by Chief Ship Surveyor

Received from Chief Ship Surveyor **2- MAY 1923**VESSEL'S NAME Stl. Sc. Sr. "BRANT COUNTY"Rpt. St. J. No. 1931

The remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/92.)

Nature of Survey

The class of this vessel is subject to the bow plating, etc., damaged through encountering ice, being further examined at the next dry docking and repaired as considered necessary.

The St. John, N.B. Surveyor now reports that owing to heavy weather some rivets were found leaking on the port side in way of No. 1 tank. Temporary repairs have been effected and the Surveyor recommends the vessel be placed in dry dock for permanent repairs at a convenient opportunity.

It is submitted the vessel appears worthy to remain as classed without record of survey, subject to permanent repairs being effected in way of No. 1 tank at a convenient opportunity, as recommended and subject as above.

As now. Subject etc.
