esc

sp. "Lennep".

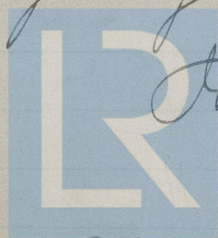

Ham Rpt 14327.

German built vessel.

This vessel's machinery was made at Rostock in 1914-5. and this report is made up from one on a sister vessel & from entries in Mr Köhler's journal. from the latter it appears that the engines & boilers were examined during construction but were not surveyed when being fitted on board nor were the boilers tested. The 1st Special Survey No. 1 became due in January 1919.

It is submitted before this machinery is classed it should be submitted for the Special Survey.

The Shipping Controller should be asked to state what his intentions are regarding this vessel's class.
