

"LLOYD CUARTO" and "RIO DAS ANTAS"

Reference letter of 16.8.55.

SUBMITTED the RIO DE JANEIRO Surveyors be advised that the above ships have not been disclassed, but that the class has been suspended on account of overdue surveys other than Special Surveys.

The question of reclassification does not therefore arise meantime, but in view of the new Owners' request for continuation of class they might be advised that the normal Special Surveys (C) due within the next two months should be held. In view of the age of these ships and the fact that the next drilling surveys become due in 1957 and 1958, they might be approached about carrying out a Special Survey (D) at this time.

*Special Survey of engines &
hulls, including remanufact
to be carried out*
