

REPORT ON ELECTRICAL EQUIPMENT.

(OTHER THAN FOR THE PROPULSION OF THE VESSEL)

Received at London Office OCT 29 1940

Date of writing Report 5th Oct 1940 When handed in at Local Office 25-9-40 Port of Musselburgh

No. in Survey held at Hammie Hill on Sea Date, First Survey 14 Aug Last Survey 14 Oct 1940
Reg. Book. (Number of Visits 10)

on the Lifting Camel "L.C. 10" (J. 4220) Tons {Gross 918
Net 814

Built at Hammie Hill on Sea By whom built Furness S.B. Co. Ltd. Yard No. 336 When built 1940

Owners The Admiralty Port belonging to Harbour

Electrical Installation fitted by Furness S.B. Co. Ltd. (Gen. Supr.) Contract No. 336 When fitted 1940

Is vessel fitted for carrying Petroleum in bulk No Is vessel equipped with D.F. No E.S.D. No Gy.C. No Sub.Sig. No

Have plans been submitted and approved Yes System of Distribution Double wire Voltage of supply for Lighting 220V

Heating Power Direct Alternating Current, Lighting Yes Power Yes If Alternating Current state frequency Prime Movers

has the governing been tested and found efficient when the whole load is suddenly thrown on and off Yes Are turbine emergency governors fitted with a trip switch as per Rule Yes Generators, are they compound wound Yes, are they level compounded under working conditions Yes

if not compound wound state distance between generators Yes and from switchboard Yes Where more than one generator is fitted are they arranged to run in parallel Yes, are shunt field regulators provided Yes Is the compound winding connected to the negative or positive pole negative

Have machines over 100 kw. been inspected by the Surveyors during manufacture and testing Yes Have certificates of test for machines under 100 kw. been supplied Yes and the results found as per rule Yes Are the lubricating arrangements and the construction of the generators as per rule Yes Position of Generators machinery space port side to ram

flat is the ventilation in way of generators satisfactory Yes are they clear of inflammable material Yes if situated near unprotected combustible material state distance from same horizontally Yes and vertically Yes are the generators protected from mechanical injury and damage from water, steam and oil Yes are the bedplates and frames earthed Yes and the prime movers and generators in metallic contact Yes Switchboards, where are main switchboards placed machinery space port side

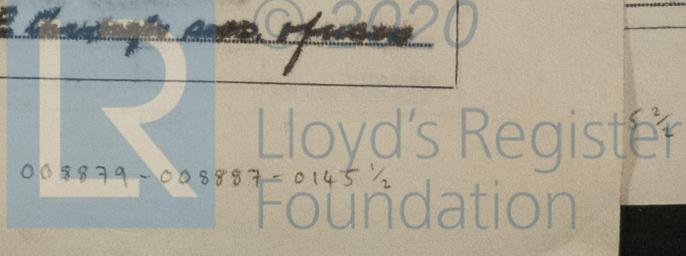

adjacent to generating set are they in accessible positions, free from inflammable gases and acid fumes Yes are they protected from mechanical injury and damage from water, steam and oil Yes if situated near unprotected combustible material state distance from same horizontally Yes and vertically Yes what insulation material is used for the panels best finish "Kivulung" if of synthetic insulating material is it an Approved Type Yes if of semi-insulating material (slate or marble) are all conducting parts insulated therefrom as per Rule Yes Is the frame effectually earthed Yes

Is the construction as per Rule Yes including accessibility of parts Yes absence of fuses on the back of the board Yes individual fuses to pilot and earth lamps, voltmeters, etc. Yes locking of screws and nuts Yes labelling of apparatus and fuses Yes fuses on the "dead" side of switches Yes Description of Main Switchgear for each generator and arrangement of equaliser switches Double pole

knife switch and double pole fuse

and for each outgoing circuit Double pole knife switch and double pole fuse

Are compartments containing switchboards composed of fire-resisting material or lined as per Rule Yes Instruments on main switchboard one ammeters one voltmeters one synchronising devices. For compound machines in parallel is the ammeter connected on the pole opposite to the equaliser connection Yes Earth Testing, state means provided E. lamps inserted & E. lamps and fuses

Switches, Circuit Breakers and Fuses, are they as per Rule 7/0, are the fuses an approved type 7/0, are all fuses labelled as per Rule 7/0, are the reversed current protection devices connected on the pole opposite to the equaliser connection 7/0, have they been tested under working conditions 7/0.

Joint Boxes, Section Boards and Distribution Boards, is the construction and position as per Rule 7/0. Cables, are they insulated and protected as per the appropriate Tables of the Rules 7/0, if otherwise than as per Rule are they of an approved type 7/0.

state maximum fall of pressure between bus bars and any point under maximum load 4/1000, are the ends of all cables having a sectional area of 0.04 square inch and above provided with soldering sockets 7/0. Are paper insulated and varnished cambric insulated cables sealed at the exposed ends 7/0 with insulating compound 7/0 or waterproof insulating tape 7/0.

Are all the cable runs in accessible positions, not exposed to drip or accumulation of water or oil, high temperatures or risk of mechanical damage 7/0, are cables laid under machines or floorplates 7/0, if so, are they adequately protected 7/0.

Are cables in machinery spaces, galleys, laundries, etc., lead covered 7/0 or run in conduit 7/0. State how the cables are supported and protected 7/0. Cables in machinery space and sewage gas space - L.C.B. Cables in accommodation space - L.C.B. Cables clipped to tray 7/0 or run clipped on second grounds 7/0.

Are all lead sheaths, armouring and conduits effectually bonded and earthed 7/0. Refrigerated chambers, are the cables and fittings as per Rule 7/0. Are all cables passing through decks and watertight bulkheads provided with deck tubes or watertight glands 7/0, where unarmoured cables pass through beams, etc., are the holes effectively bushed 7/0 and with what material Lead.

Alternative Lighting, are the groups of lights in the engine and boiler rooms arranged as per Rule 7/0. Emergency Supply, state position 7/0 and method of control 7/0.

Navigation Lamps, are they separately wired 7/0 controlled by separate double pole switches 7/0 and fuses 7/0. Are the switches and fuses in a position accessible only to the officers on watch 7/0, is an automatic indicator fitted 7/0. Secondary Batteries, are they constructed and fitted as per Rule 7/0, are they adequately ventilated 7/0.

Fittings, are all fittings on weather decks, in stokeholds and engine rooms and wherever exposed to drip or condensed moisture, weatherproof 7/0. Are fittings installed where readily combustible materials or inflammable or explosive dust or gases are likely to be present 7/0, if so, how are they protected 7/0.

and where are the controlling switches fitted 7/0, are all fittings suitably ventilated 7/0. Searchlight Lamps, No. of 7/0, whether fixed or portable 7/0, are their fittings as per Rule 7/0.

Heating and Cooking, is the general construction as per Rule 7/0. Are the frames effectually earthed 7/0, are heaters in the accommodation of the convection type 7/0. Motors, are all motors constructed and installed as per Rule 7/0 and placed in well-ventilated compartments in which inflammable gases cannot accumulate and free from damage from water, steam and oil 7/0, if situated near unprotected combustible material state minimum distance from same horizontally 7/0 and vertically 7/0.

Have motors of 100 BHP and over been inspected by the Surveyors during manufacture and testing 7/0. Have certificates of test for motors under 100 BHP intended for essential services been supplied and the results found as per Rule 7/0. Control Gear and Resistances, are they constructed and fitted as per Rule 7/0.

Lightning Conductors, where required are they fitted as per Rule 7/0. Ships carrying Oil having a Flash Point less than 150° F. Have all the special requirements of the Rules for such ships been complied with 7/0, are all fuses of the cartridge type 7/0.

are they of an approved type 7/0. If portable lamps for use in dangerous spaces are supplied, are they of a self-contained battery-fed flameproof type 7/0. Spare Gear, if the vessel is for open sea service have spares been provided as per Rule 7/0, are they suitably stored in dry situations 7/0.

Insulation Tests, has the insulation resistance of all circuits and apparatus been megger tested and found satisfactory 7/0.

PARTICULARS OF GENERATING PLANT.

DESCRIPTION OF GENERATOR.	No. of	RATED AT				DRIVEN BY	WHERE DRIVEN BY AN INTERNAL COMBUSTION ENGINE.

MOTOR CABLES.

ALL IMPORTANT MOTORS TO BE ENUMERATED.	No.	B.H.P.
<i>No motors fitted</i>		

The Electrical Equipment is installed in accordance with the approved plans and the requirements of the Rules.
 All Insulated Conductors are guaranteed to have been tested at the maker's works as specified in the Rules.
 The foregoing is a correct description.

P. P. Stokes

Profr

Electrical Engineer.

Date *23-10-40*

COMPASSES.

Minimum distance between electric generators or motors and standard compass.....

Minimum distance between electric generators or motors and steering compass.....

The nearest cables to the compasses are as follows:—

A cable carrying Ampères feet from standard compass feet from steering compass.

A cable carrying Ampères feet from standard compass feet from steering compass.

A cable carrying Ampères feet from standard compass feet from steering compass.

Have the compasses been adjusted with and without the electric installation at work at full power

Has the effect of switching on and off circuits, motors and other electro-magnetic apparatus within the vicinity of the compasses been noted

The maximum deviation due to electric currents was found to be degrees on course in the case of the standard compass, and degrees on course in the case of the steering compass.

Builder's Signature. Date.....

Is this installation a duplicate of a previous case *no* If so, state name of vessel

General Remarks (State quality of workmanship, whether insulation tests, etc., have been made, opinions as to class, etc.) *The electrical*

equipment of this lifting crane has been installed in accordance with approved plans and with the specification. The materials used are of good quality and the workmanship is good. On completion the equipment was run under working conditions with satisfactory results, the insulation resistance of all circuits was measured and the spare gas was examined.

The equipment is in my opinion suitable for a vessel holding the Builder's class.

*Noted
 30/10/40*

Total Capacity of Generators *6* Kilowatts.

The amount of Fee	£ 12 : - :	When applied for,	25-9-1940
(Including <i>specify</i>)		When received,	19
Travelling Expenses (if any) £	: :
