FREEBOARD REPORT on the

008917-008924-0112

Gross Tonnage

1943

" Temple Yard "

It is submitted ~~freeboard certificate and copy be forwarded to~~

~~for issue when~~

The New York Office be informed by
night letter that the Surveyors Rpt C 11 (contd), and Rpt C 12 (a)
and provisional load line certificate in respect of the
closing of the tonnage opening have been received.
It is presumed that a load line renewal survey has
been carried out at this time and they should inform
this office of the recommendations of the surveyors for
the date of validity to be inserted on the new load
line certificate, observing that it is understood the vessel was
placed in dry dock.
According to the requirements of the Ministry of
Way Transport Memorandum (M. 3384/41) this vessel was
given an increase of 9 inches in draught on closing the
tonnage opening. This type of vessel does not obtain
a further increase in draught in accordance with the
M.C.W.T. Memorandum (M. 15-1969/41) and the Surveyors were
not in order, therefore, to attach an endorsement for
deep loading to the provisional load line certificate.

S.B. L.B. 28/1/43.

Surveyor.
