

Extract from Malmo Classing Letter dated 11.5.54.

3325 "HAVJARL". This vessel has today been classed #100A1 "Carrying petroleum in bulk" together with the appropriate notations as recommended by you.

It is concluded that this vessel is a sister ship to the "AMPHION", but I shall be glad to receive your confirmation on this point.

It is concluded that the 10" emergency bilge suction in the engine room has been fitted, but confirmation of this point is desired.

I shall be glad if you will forward particulars regarding the steam engine driving the 190 KVA generator to enable a Certificate or First Entry Report to be obtained.

I shall be glad if you will confirm that the exhaust gas boiler cannot work independently of the Scotch boilers, also state the pressure at which the exhaust gas boiler safety valves were adjusted, 150 lb. or 180 lb.
