as Mr. Mares.

I am forwarding to day the  
 card of Harland & Hollingsworth's  
 134 Silver Shell. In my hurry to get it  
 to catch the mail (as we are extremely  
 here) I forgot to put in the tonnage between  
 0 level line & top of double bottom in E  
 space. This measures about 30 tons which  
 the corrected under deck 5099. As this  
 is practically a sister to the Melania  
 Builders are naturally anxious to get  
 similar freeboard. I have told them that this  
 scarcely possible but if by any chance  
 can be brought down, the same will be  
 highly appreciated by the Builders.

With kindest regards

Yours sincerely

A W Mhab
