

S.S. "SHINAI MARU".

The registered depth has been given on the Certificate of classification as 29.08 feet, as reported on the First Entry report.

As the Registered Depth of a vessel in this country is not usually the same as the moulded depth, and is measured from the inner bottom to the top of beam at middle line, it is submitted the Kobe Surveyors should be requested to state whether ~~the figure~~ <sup>*The figure given by them is*</sup> in accordance with the Japanese Law for registered depth, and if the registered depth is in order as reported, viz:- 29.08 ft.
