

3rd December, 1949.

Enclosures.

Dear Sirs,

S.

Intimation has been received from Mr. Hill, the Marine Superintendent of Messrs. Plymouth Shipping Co., 9 Parade, Plymouth, that the Steamer "TEMARA" has been purchased by his firm and that it is their intention to convert the ship for dry cargo carrying before placing her in service.

In this connection Mr. Hill has requested that he be supplied with the Mid-Section, Profile, Midship O.T. Bulkheads and Boiler Plans, and as the work is likely to be carried out in your district, copies are enclosed herewith for transmission to the Owners.

An account for £5.5.0 to cover cost of preparation of the plans is also enclosed.

It is the Owners' intention also to carry out any outstanding survey work, and I enclose the deferred reports, which please return to this office after the Owners have been informed of the survey position.

Yours faithfully,

Clerk to the
Classification Committee.

The Surveyors,
PLYMOUTH.
