Received by Chief Ship Surveyor.....

Received from Chief Ship Surveyor..... 4 - APR 1927

VESSEL'S NAME Steel Sc. "SHOWA MARU". Rpt. Kob. No. 5601.

The remarks of the Chief Ship Surveyor are desired on this case for the consideration of the Classing Committee.

("The endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case, so that the Classing Committee may have all the salient points presented in the endorsement."—Extract from Sub-Committee's Report, 24/5/02.)

Nature of Survey.....

The Kobe Surveyors recently reported this vessel examined in dry dock and found in a good condition, wear and tear excepted.

The same Surveyors now further report the vessel placed in dry dock, the bottom cleaned and coated.

The oil fuel settling tanks have been removed and the oil fuel connections dispensed with and side coal bunkers erected in place of the tanks at port and starboard sides of boiler space, to the Surveyors' satisfaction.

It is submitted the vessel appears worthy to remain as classed, with record of survey 2,27, as recommended.
