

S.S. "WATERBUCK"

On further enquiry being made of the Secretary of the Company, he states that there is no alteration in the position regarding this steamer.

The Brokers in whose hands the vessel has been placed were informed exactly of the position of the vessel's classification, but as any purchase will be made either in East Africa or in India, it is impossible for the Company to furnish any information for some time to come.

In the circumstances, he suggested that it might be preferable, from the Committee's point of view, if the class were expunged, as he cannot see that there is any immediate prospect of the vessel being submitted to Special Survey.
