

"SOUTHERN HARVESTER" & "SOUTHERN VENTURER"
Helicopter Electrical Equipment

IT IS SUBMITTED the Newcastle Surveyors be informed that their remarks have been noted.

For the special application in question no exception would be taken to the portable pump motor concerned being supplied at 230 volts single-phase A.C. from the flameproof socket provided subject to effective arrangements being made for earthing the motor frame via an earth continuity conductor in the flexible cable and a non-flameproof motor of the squirrel cage type could be accepted provided it does not incorporate cut out devices in association with its starting arrangements.

The starting switch will require to be flameproof.

4th November, 1954.
