No. 8056

REPORT OF SURVEY FOR REPAIRS, &c., OF ENGINES AND BOILERS

Date of Survey Report 26-1-50 Date Surveyed 26-1-50 Port of SINGAPORE

23 FEB 1950
SINGAPORE

No. in Survey held at SINGAPORE Date First Survey 13-1-50 Last Survey 16-1-1950

12642 on the Machinery of the Motor Vessel SCREW S.S "HONG TAT"

Gross Tonnage	394	Vessel built at HESSE	By whom HENRY SCARR, LD	When 1945
Net Tonnage	112	Engines made at HULL.	By whom AMOS-SMITH, LD	When 1945.
Nominal Horse Power	375 HP	Boilers, when made (Main) 1945.	(Donkey)	
No. of Main Boilers	1 SB.	Owner THE HO HONG STEAMSHIP CO (1932) LD.	Owners' Address —	
No. of Donkey Boilers	—	Managers —	Port SINGAPORE Voyage —	
Steam Pressure in Main Boilers	200 lbs	If Surveyed Afloat or in Dry Dock AFLOAT - SLIPWAY (TANTONG PHU)	Particulars of Classification (which name is given precisely as in Register Book & Supplements)	
In Donkey Boilers	—	(State name of dock)		

Last Report No. Port

Particulars of Examinations and Repairs (if any) COMPLETION MBS.

Periodical Survey, when held, must be reported briefly and include in the tenth of the Rules. With respect to the cause of Report, if any, and, in detail, the nature and extent of reparations and arrangements made. Repairs or account of damage from causes of accident, which should be reported from Surveyor due to other causes, and services being rendered in the body of the report, should be briefly mentioned at the end of the report. State also the date and method by which repairing this was done.

Invaluable cases where the Surveyor has not made a special damage report, it is required to state whether he offered his services for this purpose, and why they were declined.

Was a damage report made by anyone else? If so, by whom?

Did the Surveyor personally go inside each Main Boiler separately and make a thorough examination at this time? No.

Did the Surveyor examine the Donkey Boiler? —

Did not, state for what reason Examined 19.7.49. What parts of the Boilers could not be thus thoroughly examined?

What special means, in the absence of internal examination, were adopted by the Surveyor to assure himself of the thorough efficiency of those parts of each Boiler? —

State latest date of internal examination of each boiler. —

Did the Surveyor examine the Safety Valves of the Main Boilers? —

To what pressure were they afterwards adjusted under steam? —

Did the Surveyor examine the Safety Valves of the Donkey Boilers? —

To what pressure were they afterwards adjusted under steam? —

Did the Surveyor examine all the manholes, doors and their fastenings of the Main Boilers? —

, and of the Donkey Boilers? —

Did the Surveyor examine the drain plugs of the Main Boilers? —

, and of the Donkey Boilers? —

Did the Surveyor examine all the mountings of the Main Boilers? —

, and of the Donkey Boilers? —

Was the screw shaft now been drawn and examined? No. Was it a continuous liner? —

Is an approved oil retaining appliance fitted at the after end? —

Has the shaft now fitted been previously used? —

Has it a continuous liner? —

Is an approved oil retaining appliance fitted at the after end? —

State date of examination of Screw Shaft. —

State the wear driven in the stern bush 32/100

Is electric light and/or power fitted? YES. If so, did the Surveyor examine the generators, motors, switchgear, cables and fuses? YES.

Has the insulation resistance of the generators, circuits and apparatus been tested and found to be not less than 100,000 ohms? YES.

Engines parts, when referred to by numbers, should be counted from forward.

If the Survey is not complete, state what arrangements have been made for its completion and what remains to be done.

BC Report No 7871 a)

Now done. Vessel placed on slipway, propellers, sea connections and their fastenings examined and found in good order.

The following parts opened up, examined, and sundry minor repairs effected:— The condenser, independent boiler feed pump, generator engines (2), oil fuel pressure pumps and burning arrangements, general service pumps (2) also the valves, cocks, pipes and strainer of the pumping arrangements.

Electrical equipment examined and tested as required by the Rules; the fittings on the main and the sub-distribution switchboard examined, the electric cables examined, the insulation resistance of the generators, cables, and other fittings tested and after minor repairs found satisfactory. The installation examined and tested under working conditions and found satisfactory.

General Observations, Opinion, and Recommendation:— The machinery of this vessel is eligible, in my

opinion, to remain as classified and to have fresh record of MBS* (with date)

Survey Fee (per Section 25). COMP. MBS \$: 50/-

ELECTRICAL EQUIP. \$: 50/-

Special Damage or Loss (if any) \$: 50/-

Travelling expenses (if chargeable) \$: 5/-

Committee's Minute WED. 22 MAR 1950

Assigned MBS * 7.49

CERTIFICATE WRITTEN.

J.W.P. Waterer

Engineer Surveyor to Lloyd's Register of Shipping.

009331-009340-0145

Insert Character of Ship and Machinery precisely as in the Register Book.

SOCIETY'S SINGAPORE OFFICE.

Is a Certificate required? If so, to be sent to
