Sent to Chief Surveyors 7 - 2 - 23

Received from Chief Surveyors

VESSEL'S NAME Stl. T. Sc. "THE 60 TON CRANE" Report Mch. No. 4990

For the CHIEF SHIP SURVEYOR and CHIEF ENGINEER SURVEYOR

(In cases which have to be submitted to the Classing Committee the endorsement to contain a succinct summary of any repairs that have been required and to show the cause or causes of such repairs, and also to bring out clearly any exceptional features in connection with the case so that the Classing Committee may have all the salient points presented in the endorsement. - Extract from Sub-Committee's Report, 24/5/22.)

Nature of Survey Equipment. When due

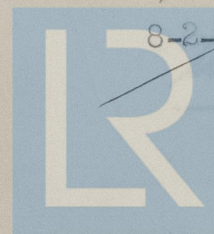

Record of Survey 7.22 was made in this case subject to the anchors then in the workshops being replaced on-board, its having been stated that there was only one anchor on board at the time of the Survey.

The Manchester Surveyors now forward a letter from the Owners stating in view of certain inconveniences which attend on the presence on deck of the full complement of five anchors, they would prefer not to replace the three anchors which have been removed and to acquiesce in the class of this Crane Barge being changed to A -

In view of the above, and the service in which the vessel is engaged, the case is submitted for the consideration of the Committee.
