Trieste, August 8th, 1921.

Via della Borsa N.º 2.

Dear Sir,

With reference to the 1st Entry Report for machinery of the S.S. "LODOLETTA", Messrs M.U. Martinolich No. 189, I think it well to report as follows:-

The boiler was originally intended to be constructed in Prague together with the machinery. However, as the Builders desired to have the vessel completed by the end of June 1921, if possible, on account of the Government subvention, and the boiler at Prague was not ready, Messrs Martinolich purchased another boiler from Messrs Ansaldo at Genoa, which boiler was already made.

A plan of this boiler was submitted to London by the Genoa Surveyors with a letter dated 22nd April, 1921, and was approved (see London letter 4th May 1921 to Genoa), provided the results of the tests of material be in order, the scantlings be in accordance with the plan, and the boiler be examined, tested, and fitted on board in accordance with the requirements of the Rules.

All of these conditions have been complied with, but the results of the tests of material have not so far been produced.

On communicating with the Genoa Surveyors with a view to these test results being obtained from Messrs Ansaldo, we are informed that this firm have up till now refused to give this information, and have referred the Surveyors to the Owners, stating they had made no contract for the boiler to be under Lloyd's survey. The owners and builders, Messrs Martinolich, state they have not any particulars of tests of material and we are again communicating with them suggesting that they should apply direct to Messrs Ansaldo for this information. Should it be forthcoming we shall at once forward the particulars.

I am, Dear Sir,

Yours faithfully,

The Secretary,

TRIESTE.
