George.

Referring to the foreboard of
Hess' No 175. There are one or
points I shall be glad of
information from you about
you can spare the time.
There any limit to the position
of a bulkhead inside a
or may occupy, as supposing
have a short saloon inside
say it may be only 10 or 12'
from the bridge front.
is there no allowance

for fresh water.
It seems to me according to the
report you have sent that the
vessel can now load 1 1/4"
deeper for the WNA than she
could if she had no side
scuttles at all, how is this
explained.

Hope you enjoyed the holiday,
and are in good health, all
the female portion of my family
are down at Portsmouth for an
unlimited time so I am a
bachelor for the time being.

With kind regards

Yours faithfully
J. W. Baker
