C. J. HUDSON
SURVEYOR

NEWPORT NEWS, VA.,

June 24th, 1927.

James French, Esq.,
Chief Surveyor,
Lloyd's Register of Shipping,
17 Battery Place,
New York, N.Y.

REC'D NEW YORK JUN 25 1927

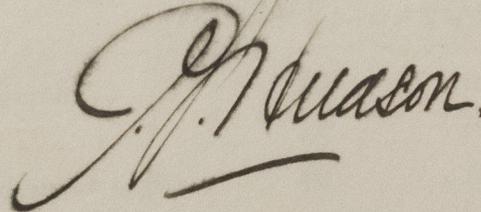

S/S "IROQUOIS"

Dear Sir:-

I have to acknowledge your letter of June 22nd, 1927, having reference to my electric light report (report No. 4229) on the above Steamer, and in reply have to state that two cables are fitted for carrying the 652 amperes. The cables have actually been designed to carry a total of 764 amperes under continuous conditions, from which it will be seen that, the area of these cables is ample for the requirements.

The report on the S/S "SHAWNEE" sister vessel will be so worded when forwarded on completion. }

Yours very truly,

CJH/MP
