ENCLOSURES

S

Dear Sirs,

Whaling Factory "BALAENA"

The contents of your report No.18854 are noted but before submitting the case to the Committee, I shall be glad to learn the reasons for the bone and blubber press boiler safety valves being adjusted to 60 lb. as the approved pressure is 70 lb.

In this connection I forward the attached memo from Mr. Walker together with Oslo Report No.5965 which should be returned in due course with your remarks.

It is noted that in addition to the completion and testing of the factory electrical equipment you state that several small items remain to be completed. I have therefore to request that you will detail the outstanding machinery items of any matters affecting classification in order that the full information is available here.

Yours faithfully,

The Surveyors,
SOUTHAMPTON.

Clerk to the
Classification Committee
