

"BALAENA"

Sou. 18854

Before this case receives consideration  
IT IS SUBMITTED the Southampton Surveyors be requested to  
state the reasons for the bone and blubber press boiler  
safety valves being adjusted to 60 lbs. as the approved  
pressure is 70 lbs. The attached memo<sup>x</sup> is forwarded for  
their information and should be returned together with  
their remarks. OS's rpt 5965 is also enclosed. & should also be returned

x Mr. Wang

In addition to the completion and test  
of the factory electrical equipment the Surveyor states  
that several small items remain to be completed. They  
should be requested to detail the outstanding machinery  
items in order that the full information is available  
here.

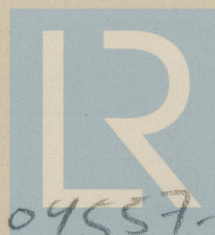

See Sm. letter  
18.11.46.

The Belfast Surveyors should confirm  
the heating surface of the superheaters. The information  
as per attached report from Newcastle (which should be re-  
turned after perusal) shows 4,550 sq. ft. Their remarks  
are awaited.

See Bel  
letter 19.11.46
