4th.November, 1944.

Dear Mr.Reed,

80 ft. Coasters.

With reference to the engine room bilge suction
for these vessels, as it is not possible to comply strictly with
classification requirements, in so far as the mud box cannot be
placed in such a position that a rod can be lowered down the suction
pipe, it is agreed that this requirement can be dispensed with.

Yours faithfully,

(Signed) T.Wilfred Davis.
