

Steamer "TINTERN ABBEY"

The new Owner's daughter, Miss Canale, has called here this afternoon and has been informed that for postponement of the Special Survey for six months it will be necessary for the hull to be generally examined by the Cardiff Surveyors. As regards the machinery, the opening up will be left to the discretion of the Surveyors with at least special attention being given to the HP cylinder, etc. The overdue Screwshaft and Main Boiler Surveys should be held and if the donkey boiler is to be used it also should be surveyed.

She has also been informed that for a Load Line Certificate it will be necessary for the local Consul to ask our Surveyors to issue such a Certificate.
