S.S. "HELGA MOLLER".

In view of a request received by Mr. Bartlett from Mr. Atkinson of Mollers Ltd., that arrangements should be made for the extension of the Load Line Certificate for two months, I have communicated with the latter in order to explain the classification position.

Mr. Atkinson appreciates that as the Owners have decided to relinquish the class, as stated in the recent cablegram from Shanghai, the case cannot be dealt with for Load Line extension on the same terms as would have applied for a classed ship in which classification survey arrangements were in order.

From the Owners' point of view the proposed sale of the vessel to China naturally influences any decision involving expenditure but Mr. Atkinson understands the situation from the Society's point of view and has promised to communicate with this Office after he has discussed the matter with Mr. Moller.
