Dear Sir,

In reply to your Classing Letter of the 26th October, I have to say that the compasses have been adjusted with and without the electric installation at full power, and the effects of switching on and off circuits, motors and other electro-magnetic apparatus within the vicinity of the compasses have been noted and found to be nil.

The moving parts of the switches are not alive in the "off" position.

Regretting that these matters were not made clear in my report,

I am, Dear Sir,

Yours faithfully,
