5th. June 1961.

Dear Sir,

"KATINGO" ex "WAYNEGATE"

The above vessel has recently been purchased by Greek interests and transferred to the Greek flag at this port.

The new owners are:-

Messrs. Pacifico Compania Naviera S.A.

Port of Registry - Pireaus.

*Publ.  
19/6  
RAB*

A Greek Load Line Certificate has been issued here, after carrying out a satisfactory general examination of the freeboard items and verifying the freeboards and lettering on the ship's sides. The re-registration of the ship was sighted on board and the official number and signal letters were inserted on Load Line Certificates.

A completion survey of the Safety Equipment has been held and Report S.E.1, is being sent to the London Office of the Society with the recommendation that a Safety Equipment Certificate is issued.

It was originally intended to carry out a general examination at Middlesbrough when the vessel changed ownership, however the Owners stated that they desired if possible to commence special survey when the vessel drydocked at Liverpool, where she was proceeding from this port via Flushing.

Permission was granted from London Office by telephone for the vessel to proceed to Liverpool, on the understanding that she would be drydocking there, and that either the General Examination would be carried out completely, or the Special Survey would be commenced.

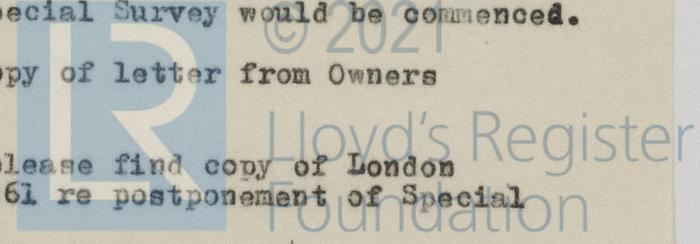

See attached copy of letter from Owners Superintendent.

Also attached please find copy of London letter dated 25th. May 1961 re postponement of Special Survey for this vessel.
