

"DIRECTOR MADARIAGA"

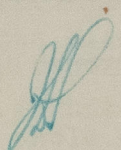

Lighting Fittings in Bridge 'Tweendeck Space.

This matter was the subject of an endorsement dated the 9th November, 1950. It is now proposed to replace with lead bushes the rubber bushes used in the cable glands and it is considered that the flameproof lighting fittings installed could be accepted in this instance, subject to the cable glands being modified as stated.

Messrs. P. Smit's Yard No.597
"LA PLATA"

The above considerations are applicable also in the case of this vessel, and it is considered that the lighting fittings now installed in the bridge 'tween deck space could be accepted in this instance also, subject to a similar modification.

IT IS SUBMITTED the Surveyors be informed accordingly.

5th January, 1951.
