

URGENT

Steel Non-Propelling Bucket Dredger "FOREMOST"

-----

This vessel and her machinery were built under the survey of the Society's Surveyors at Rotterdam and she was classed \*100 A1 - Dredger in July last year.

As the machinery was not for propelling purposes a special certificate was issued at the request of the Owners stating that it had been surveyed during construction and found to be in accordance with the Rules and in good working condition.

A representative of the Owners has to-day called at the Office and states that the vessel is under survey at Southampton and they desire a special survey and examination of the machinery in order that a certificate may be issued stating that it is good working condition and in accordance with the Society's Rules.

This request is submitted for approval and a wire should be sent to the Society's Surveyors at Southampton instructing them to carry out the survey.
