

S.S. "DAVID C. REID".

It is submitted the Sourabaya Surveyor might be informed that, while the class of this vessel was expunged with a Black Line in April, 1927, she subsequently came under survey at Mobile in June, 1928, when new engines, built in 1920, were fitted in her, and the survey of the machinery completely carried out for reclassification.

The survey of the hull for reclassification has been carried out with a view to the record of Special Survey No.3, except as follows:-

All tanks require to be tested with the exception of the after peak tank and engine and fire room double bottom tanks. Fore peak tank and forward pump room to be repainted.

Indented plating E No.6 and F No.4 port, and E No.6 starboard requires to be faired at the Owners' convenience.
