2 Enclosures

RPH

22nd April, 1924.

Dear Sir,

I am in receipt of your telegram of to-day's date and in compliance with your request enclose herewith the hull and machinery classification certificates of the steamer "CEDARTON", and if an advice has been received from the Greenock Surveyors that the machinery fees have been paid these certificates can be handed over to the proper parties.

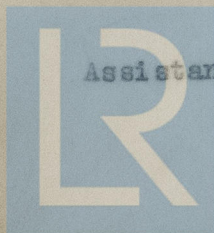

I shall be much obliged if you will kindly ascertain from the Surveyors and let me know whether the thickness of the shell plating at the break is as approved, and the thickness of the forecastle side plating and riveting of edges and butts of the same are as required by the Rules.

I am, Dear Sir,

Yours faithfully,

The Secretary,

GLASGOW.
