Completion of First Entry.

The vessel examined generally afloat as far as practicable.

The windlass tested under working conditions.

The steering gears tested under a trial in the Sound and found working satisfactory.

Copies of interim certificates, hull and freeboard, issued in this case are enclosed herewith.

The vessel has now proceeded to Gothenburg for drydocking and fitting of additional docking brackets. The Surveyors at that port have been informed accordingly.

*Yes. Surveyors' Office, Malmö.*

This vessel is eligible, in my opinion, to be classed in the Register Book of this Society, viz:-

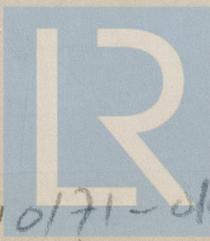

100Al Carrying Petroleum in Bulk. Electrically welded. Launched 9.41. Completed with date.

Please see Malmö First Entry Report No.2156 of the 14th May, 1943).
