

52 OCT 1945

"SYSLA" (ex "Katherine Stenersen").

Mmo.2280
Got.14344.

The machinery of this vessel was installed in 1942 and the Survey completed except for trials under working conditions.

Parts of the machinery and the internal surfaces of the donkey boilers have been examined, the propeller backed off and Screwshaft cone examined and the donkey boiler safety valves adjusted, and all machinery found satisfactory under working conditions. The vessel would be eligible for the Record ~~of~~ LMC 8.45.

In view of the Owners' letter that the vessel is to be classed with the Norwegian Veritas it is submitted no action be taken.
