

S.S. RAMON ALONSO R.

It is submitted

The entire case should now be forwarded to the seller for endorsement and/or comment regarding the machinery classification survey reports.

It should be noted that the surveyor has already informed the owners of the outstanding requirements incl. 60 fathoms of main cable to be renewed, and tail shaft to be drawn, in a letter of August 16. The owners replied on August 20 stating they would advise him when these items would be available for examination.
