22.11.28.

It is concluded that a connection from the boilers  
has been fitted to the circulating inlet as required by Section 41  
of the Rules for Steel Ships (Strengthening for Ice Navigation).

The Surveyor <sup>SHOULD</sup> give the number, description and area of  
the donkey boiler safety valves and state the pressure to which  
they have been adjusted and also whether they are fitted with  
easing gear.
