Dear Sir,

With reference to your letter of September 15th, 1926, regarding Vancouver Report No. 1651 on the electric lighting installation of the Motor Vessel "MARVOLITE".

I have to state that the candle power of the lamps on this vessel has been reduced throughout, bringing the wires well within the maximum allowed by table 1.

The joints in Cables are made in joint boxes in accordance with section 6, paragraph 4, of the Rules.

The supply of new forms for reporting electric light installations has not yet come to hand.

Yours very truly,
