Meroolite.

Ver. 1657.

Elec. Light.

fore this case receives consideration, it is submitted
the Surveyor be requested to state whether the sizes of
cables & their respective loads are correctly
stated, the ampérages, except in the case of the
light cables, being greater than the maximum
permitted by Table I of the Rules for the sizes of the
cables as reported.

It is concluded that all joints in cables are made
in boxes as required by Section 6, Par. 4 of the
Rules & that the soldering of cables mentioned in the
Report refers only to soldered sockets for cables 1/4
inch area & above, but this should be
stated.

The Surveyor should be requested to use the new form for
reporting electric light installations in future cases.
