

## RADONICICH LIMITED

Steamer "LIKA"ED  
N

Although the survey of the hull and the Freeboard Survey were completed in June, the vessel remained under the survey of the Engineer Surveyors until the 16th August. The Load Line Certificates were written in June but were not handed over until the 8th August.

Had the case been properly dealt with another visit would have been made by the Ship Surveyor just prior to sailing so that he could have synchronised the hull and machinery recommendations for class continuance. As it is there is a recommendation on the machinery for certain furnaces of the port boiler to be renewed and for the H.P. cylinder to be renewed by the end of November and a recommendation on the hull for the assignment of the notation of "Examined 6,47" with expiry date of September (i.e. 3 months).

IT IS SUBMITTED that in order to readjust the case properly the notation assigned should be amended to "Examined 8,47" (3 months) and that new Load Line Certificates should be issued with validity to correspond, i.e. until the end of November 1947.

8.9.47.
