

28th December, 1961.

PALERMO.

676, 701 "CONCA D'ORO" - As recommended, and subject to the auxiliary elements (2nd section) of both boilers being examined and renewed as necessary by the end of the present month, as recommended by the R.I. Surveyor.

With reference to your Report No. 676, you should confirm that the oil burning system and remote controls were examined and found good. You should forward a copy of the A.B. Surveyor's Report No. PL.2555, referred to in the A.B. Surveyor's Report No. PL.2554.

You should advise the Owners that although the Main Boiler Survey is not, in fact, due until August, 1962, the Surveyors to this Society should have been called in when the boilers were examined and when the repairs were carried out at your port last July.
