This is to Certify that

D. DAVID DICK

the undersigned Surveyor to this Society did at the request of Foster Wheeler Corporation, attend at their Carteret Plant on behalf of this Society and Registro Italiano Navale on the 8th April, 1953 and subsequently, for the purpose of examining and witnessing tests during fabrication of four (4) fusion welded boiler drums (2 steam and 2 water) stated to be for installation in Cantieri Navale Riunite, Genova, Italy, Hull No. 203.

Foster Wheeler Requisition to cover inspection Order No. N-94343, Req. No. NE-818-13, Charge FWE-3598-3603 dated 4-9-52.

These fusion welded drums have been constructed and tested in accordance with the approved Plans and the Society's Rules for Welded Pressure Vessels, the materials tested to the satisfaction of the Society's Surveyors and the workmanship is, in my opinion, good throughout.

The drums were subjected to hydrostatic tests in the presence of the undersigned, afterwards examined, calibrated for circularity, and found satisfactory. Radiographs of all welds and stress relieving charts were examined and found in order.

For identification purposes, the drums have been stamped as follows:
