

The attached sheet giving chemical analyses from the Kawasaki Steel Corporation ~~Fukui~~ (FUKUI Chem) has apparently been received in this office without covering papers.

It is submitted that the steel be returned to the Kobe surveyors (after making a photostat copy in case of loss) and that they be asked to indicate to what it refers.

It appears unlikely that it refers to P.403 steel, since the analyses are not consistent with those of the steels submitted by the steelworks concerned for approval under ~~the~~ clause P.403.
