OCTOBER 23rd 1919.

S.S. "KOYO MARU"

Dear Sir,

Your letter of August 29th, duly to hand and contents noted,
and in reply have to state that through some miscalculation the
measurements of Double Bottom Tanks were not correctly stated in
Report No-2499, also that this ship was the first of its type to be
built at Uraga Dock Company but was built off similar plans as Asano
Shipbuilding Company's S.S. "CHOYO MARU" their yard No- 11, also that
a spare set of Feed and Bilge pump valves were put on board.
With reference to the N.H.P. this should be 513, the fees being charged
on same accordingly.

Enclosed please find particulars of double bottom tanks measurement.

I am

Yours truly

J. G. Acland

The Secretary

London.
