Ship's Name LUXOR

Official No. 161141

Memorandum of alterations reported since ship was surveyed for assignment of Load Lines in MARCH, 1932.

Openings to poop front bulkhead originally closed by portable plates with hook bolts and by storm boards in riveted channels have had the storm boards dispensed with, the portable plates only being retained. These plates are held in position by clips and hook bolts not passing through the bulkhead. (Liv., June, 1936).
