Dear Sir,

Steamer "ADRIANA AUGUSTA"

The Society's Surveyors at Genoa have reported that this ship was examined in drydock during April/May last when a General Examination was carried out with a view to postponement of the Special Survey.

This inspection was found to be satisfactory, and the Committee have agreed to postponement of the Special Survey until April, 1962.

Fresh records of Docking Survey 5.61, Main Boiler Survey 5.61 and Steam Generator Survey 5.61 have been assigned, and the class has been continued subject to the rudder axle under the top of the coupling flange (electrically welded 5.61) being specially examined at the next drydocking.

Yours faithfully,

c.c. Trieste.

pro Clerk to the  
Classification Committee.
