

s.s. MEDIATOR

The class of this vessel was made subject to the gearing being examined under working conditions before the end of 5.45 and being opened out and examined before the end of 11.45

The Glasgow Surveyors report that the gearing was examined as far as practicable and under working conditions and found in good order, adding that the vessel has completed about 14,000 miles with about 6000 miles in tow, and at no time did the gearing shew evidence of vibration or noise,

The Committee have approved that the special condition regarding the gearing might now be waived.

It is submitted that this vessel is eligible to remain as classed without special condition.
