Dear Sirs,

Steamer "CITTA DI SALERNO"

A report of a survey held while this ship was in drydock at Rotterdam in April/May last has now been received from the Society's Surveyors.

It was recommended that the tailshaft cone should be specially examined at the next drydocking before the end of May, 1960, and the Committee have continued the class subject to this matter being dealt with by that time.

The Main Boiler Survey was held and a record of Drydocking 4.59 and the notation MBS 5.59 have now been assigned.

Yours faithfully,

C.C. PAL.

Deputy Clerk to the
Classification Committee.
