

"MIL 50"

Os1.7220.

Before this case receives consideration IT IS SUBMITTED a photostat copy of the approved "Sternframe and Rudder" plan, showing the rudder as originally fitted, be forwarded to the Oslo Surveyors, who should be informed that it would appear from the sketch of the rudder shown on their report, that there are differences which can not until now be reconciled from information in this Office.

*Copy of plan
in hand.*

They should therefore be requested to find out and advise if the rudder has at any time in the ship's history been renewed or major repairs effected and furnish a plan of the rudder as now fitted, with details of the coupling, including bolting of the rudder to the rudder head.
