Received by Chief Engineer Surveyor.....

Received from Chief Engineer Surveyor.....

30 JAN 1961

SHIP'S NAME....."ATLAS".....REPORT.....ROT.....No. 50663.

Docking.

Port donkey boiler examined internally, starboard boiler being in service. Safety valves of starboard boiler adjusted to 100lbs., parts of main engines and auxiliary engines examined as stated in this report and according to Circular No. 2151 for an advanced date of machinery survey.

It is submitted that this vessel is eligible to be commissioned and classed with advanced date of machinery of 12.60.

This information is submitted for the Committee's consideration.

*17 1/2*  
Cir. 2151 not applied to screwshaft  
& only partially applied to aux. blrs  
Advanced Dates therefore do not  
apply for screwshaft or boilers R. 26.1.61.
