

Ucano " (Española's  
Y. S. S. "Juan Sebastian ~~del Cano.~~  
21)

It is submitted the surveyors be informed that it is noted that the <sup>watertight</sup> bulkheads originally on frames 68 and 117 have now been moved to frames 67 + 119. The new positions of these bulkheads does not affect the subdivision load-line already approved.

The cloth tracing of the Lines plan with sheer amended to 72" mean end sheer and one copy of the builders flooding diagram have been retained in this Office.

It is noted that at the present stage the builders are unable to give any definite information about the openings in the ship's sides.
