

✓  
s.s. "OLYMPIC GAMES"

Confirmation of the American Minute of the 19th January has been deferred pending the receipt of approved plans on the machinery and of particulars of the torsional characteristics.

The plans have now been received and are in order but the New York Surveyors make no reference to the position in regard to torsional requirements.

As the section of the new Register Book containing the vessel's name will go to press early next week, it is submitted that particulars of class regarding the hull be inserted therein, but that the notation of LMC 11,48. be not confirmed or published until the torsional position is clear.
