S

Dear Sir,

"LAGOSIAN".

In reply to your classing letter of the 26th instant regarding Sunderland Rpt. No. 34730, we have to confirm the heating surfaces of the main and auxiliary boilers (5914 sq. ft. and 1917 sq. ft. respectively) given in the report as being correct. These boilers were converted to burn oil exclusively and the heating surfaces given represent the oil fired surface whereas the figures on the plans were based on the boilers being coal fired.

Yours faithfully,
THE SURVEYORS,
PER:

The Secretary,
LONDON.
