

513
25 FEB 1949

RL

February 23, 1949.

Dear Sir,

S.S. "CILURNUM"

I acknowledge receipt of your letter of February 15, from which it is noted that this ship will be submitted for special survey in June.

The annual survey of steering arrangements, hatchways, ventilators, machinery casings and all other weather deck openings and their means of closure should be carried out now together with the boiler survey including test of main steam pipes. The propeller shaft is very much overdue for survey and must be drawn for examination in the immediate future.

Yours faithfully,

W.H. Carslaw
SECRETARY

Ramon Zubiaga Esq.,
BILBAO.
