

20th January, 1950.

Dear Sirs,
M.V. "MARBURY".

D.O.

I have to inform you that a F.E. report has been received from Liverpool on the above vessel in which it is stated that an auxiliary engine made by Crossley, No.139359, has been installed and which was constructed under special survey. As it appears from our records that no report has been received on this engine, I shall be glad if you will forward same at your early convenience.

Yours faithfully,

The Surveyors,
MANCHESTER.

pro.Secretary.
